Conference Bulgaria

The long-term cooperation of the Troubadour research institute with the Research Institute of Mountain Management in Troyan, Bulgaria continued with participation in the 29th international conference organized by this institute.

Jan Nedělník and Tomáš Vymyslický contributed to the professional program with an invited introductory plenary lecture focused on current topics in agriculture and the possibilities of further international cooperation.

This year's conference was one of the largest in history, with almost 300 participants registered. The meeting also included a discussion on continued cooperation within the framework of the ERASMUS program. In recent years, colleagues from Bulgarian research institutions have regularly visited the Troubadour research institute, and this year will be no exception. In August, the institute will welcome three experts from the research institute in Ruse.
